Restaurants	6	\$5,700.00
Fast Food Restaurants	5	\$4,750.00
Movie Theaters	1	\$950.00

CALCULATION OF IMPACT FEES FOR COMMERCIAL ADDITION OR REMODELING

When any business or commercial property adds additional square-footage to a property or a property is remodeled which adds additional public space or water fixtures, the following basic rules for calculation of additional Impact Fees will be followed.

1. Determination of realtime water usage compared to REU (Residential Equivalent Units) in Impact Fee tables, based on the previous 1 year of usage. If an existing business is using the REU of 10 homes, but has a right, per the charts of 6 REU, then they are using 4 more REU than they have paid, or have a historical right to, for a total of 10 REU.
2. Determine Square Footage of addition or remodel devoted to public space. If a business is adding 50% to it's size, then they are increasing the basic REU value from the charts by that percentage, i.e. a business with 50% to it's size, then they are increasing the basic REU value from the charts by that percentage, i.e. a business with 50% addition and 6 REU would have an additional value of 3 REU or 9 total REU.
3. Determine of increase in the number of plumbing fixtures. If a business has 8 fixtures (toilets, basins, sinks, urinals, etc) and increase that number by 2, they are increasing by 25% the value from the charts, i.e. a business with 6 REU by the chart, with a 25% increase in plumbing fixtures would have a new REU value of 6 plus 1.5 new REU for a total of 7.5.
4. Determine the average of the three methods for final fee calculation. In the above examples, the values are 10, 9, and 7.5, with an average of 8.83 REU. The existing building has a historical right to 6, so they must pay for 2.83 additional units.

SEWER USER FEES

A. Definitions:

1. Commercial - Includes all activities engaged in within the City carried on for the purpose of gain or economic profit to include businesses, industries, churches and schools. See Impact Fee tables for REU values.
2. Dwelling - A building - A building or portion thereof designed exclusively for residential occupancy, but not including hotels, tourist cabins and boarding homes.
3. Dwelling Unit - One or more rooms and a single kitchen, in a dwelling or apartment hotel, designed as a unit for occupancy by one family, individual and/or individuals for living and sleeping purposes.
4. Hotel - Any building containing rooms intended or designed to be used for sleeping purposes by transient guests, but in which no provision is made for cooking in any individual room or suit. See Impact Fee Tables for REU values.
5. Housing, board - A building containing only one kitchen and sleeping rooms.
6. Kitchen - Any room used for or intended to be used for cooking an preparing food.
7. Residential - Used as a residence.
8. Trailer - A vehicle designed for or used for human habitation.
9. Summer - Will include the months of April, May, June, July, August, and September
10. Winter - Will include the months of October, November, December, January, February, and March
